

1) PREMIUM POLYMER TIP

The sharp point increases the SST's® ballistic coefficient, making it faster and flatter shooting. On impact, the tip also initiates controlled expansion at all velocities.

2) SECANT OGIVE, BOATTAIL SPIRE POINT PROFILE

It's a fact: bullets that travel faster hit harder. The Hornady secant ogive, boattail spire point profile gives hunters the incredible speed and downrange energy they're looking for.

3) THE INTERLOCK RING

Ensures the core and jacket remain locked solid during expansion, so the SST® retains the mass and energy needed for dramatic wound channels. Perfected in the famous Hornady InterLock™ hunting bullet.

BULLETS

When Hornady engineers set out to design a bullet that combined deadly terminal performance with a high ballistic coefficient, they found the answer to both in the SST® design.

They started with the proven design of our InterLock™ bullet, and added a sharp, pointed tip to cut through the air for faster, flatter shooting. Hornady engineers then tackled the problem of too-rapid expansion that plagues many tipped bullets and by combining a one-piece core and strengthening the jacket in critical areas, the SST® became a bullet that delivers controlled expansion, superior weight retention, and massive shock for a clean, quick kill.

In the field, you'll soon come to realize that every single detail of our Hornady SST® was engineered to shoot flatter, fly straighter, and hit harder.

Steve Skrubis using 165 gr SST's. "The pig was dropped instantly and cleanly at 100 yards," he writes. "Thanks again for the great ammo!"

Team Hornady members, **Trystan and Aidan** helped their dad, **Neil Davies**, shoot this doe along the Platte River in Nebraska, using 150 gr SST bullets handloaded in 30-06, at 250 yards.

Hornady also offers factory loaded SST® Ammo. See page 32.

Chad Kueser took this very nice axis doe shooting 30-06 Custom ammo loaded with a 150 grain SST. Chad writes, "He dropped over graveyard dead on the spot."

This antelope was taken by **Donna Hesse** in Laramie, Wyoming, shooting a Hornady 280 Remington with 139 gr. SST InterLock ammo.
