Lock-N-Load AP
No. 095100

Dies and shell plates sold separately.

RELOADING

*Note: Some manufacturer's taper crimp dies may interfere with the ejector wire when they are used in station 5. Hornady New Dimension Taper Crimp Dies are designed to work flawlessly in station 5. If you will be using dies other than Hornady, we suggest that you use our powder through expander and install the taper crimp die in the 4th station. Ejector wires are set at the factory and we DO NOT RECOMMEND adjustment.

Load at a rate of up to 500 rounds per hour

Hornady's Lock-N-Load AP is a professional grade auto indexing 5-Station progressive press that features Hornady's patented Lock-N-Load bushing system as well as a host of other features, detailed below, that set it apart from other, more expensive presses, such as the Dillon XL650.

FEATURES

1) LOCK-N-LOAD POWDER MEASURE

The LNL-AP™ uses a standard powder measure and is compatible with ALL Hornady powder measure accessories featured on pg 57. Quick change metering inserts can be preset, locked, and stored with their matching die set so you can keep pet loads the same. Changing inserts is as simple as pushing a button (see photos below). With Lock-N-Load metering inserts, a powder measure change-over can be completed in less than a minute. Try that with the competitors transfer bar style powder measure.

No. 050069 \$83.21

2) PRIMING SYSTEM

The LNL-AP™ priming system is light years ahead of other priming systems, with safety being at the top of the list. The LNL-AP priming system separates the actual priming operation from the primer magazine by 1¼ inch. This eliminates an accidentally popped primer in the priming station from sympathetically detonating the entire primer magazine. Primer shuttle wheels found on other presses are much more prone to "daisy chain" sympathetic detonation which often detonates the entire primer magazine.

The LNL-AP™ can be changed from large to small primers as easy as 1-2-3.

1. Change the spring-loaded primer seater punch from large to small or vice versa
2. Change the primer shuttle from large to small or vice versa
3. Change the primer feed tube from large to small or vice versa.

The entire process takes less than 2 minutes and is the easiest on the market. **No. 095210 \$50.41**

3) LOCK-N-LOAD™ BUSHING SYSTEM

Hornady revolutionary Lock-N-Load bushings bring a lot to the table. Most notably the ability to remove a single die with 1/12 of a turn and replace it without the need to readjust the die. Or keep multiple pre-adjusted seating dies for loading different bullets in the same cartridge. The Lock-N-Load bushing system creates a completely modular system that is much more convenient and easy to maintain than a replaceable die head. Lock-N-Load

bushings also greatly simplify die set up. Simply adjust the die, tighten the lock ring onto the bushing and the die is set forever. And, the dies will still fit in the box they came in. There's no bulky die head to deal with.

4) CASE ACTIVATED POWDER DROP

The Lock-N-Load AP™ comes standard with a Hornady Lock-N-Load Powder Measure that has our Case Activated Powder Drop system installed from the factory. This powder measure is compatible with all accessories found on page 57 and 58. The Case Activated Powder Drop will ONLY drop powder when a cartridge case is present.

5) FIVE-STATION DIE PLATFORM

Five stations allow for all the variables and still let you use your standard dies. You don't have to use a special die just for this press – most 7/8"-14 dies and 7/8"-14 powder measures will work. (Some progressive presses require their special measure or dies.)

Unlike our competitors, Hornady's one-piece die platform is stronger and lets you change dies without disassembling the entire platform.

6) CASE RETAINER SPRING

Quickly and easily remove and/or replace a case from the shell plate at any point in the cycle. Case retainer spring fits all calibers. No messing around with retainer pins that are shell plate specific.

7) AUTOMATIC INDEXING

Auto-indexing happens via two adjustable, replaceable, spring-loaded pawls in the lower linkage assembly. The press moves to 1/10th of a turn on both the down stroke and the up stroke, making for ultra smooth function with minimal powder spillage. This process is much smoother than presses that do all their indexing on the down stroke.

8) UNIVERSAL EJECTOR

Ejector automatically ejects loaded cartridges into the cartridge catcher. Comes preset from the factory for smooth ejection.

9) LARGE CARTRIDGE CATCHER

A large capacity catcher comes standard with the L-N-L AP™ Press. An extra large capacity catcher which holds up to 1/3 more completed cartridges is available as an option. **No. 480038 \$5.95**

DUST COVERS: L-N-L AP **No. 095200 \$22.87**
L-N-L AP w/Case Feeder **No. 095203 \$26.01**

Lock-N-Load™, Lock-N-Load AP™ and L-N-L AP™ are trademarks of Hornady Manufacturing Co.

L-N-L™ Automatic Case Feeder: Load at a rate of 750+ rounds per hour

With our high volume Lock-N-Load™ Automatic Case Feeder, the Lock-N-Load AP just got faster. It has the highest torque motor in the industry and an extra large case bowl that will hold over 750-223 Remington cases with ease. The LNL™ Automatic Case Feeder makes it possible for the LNL-AP™ to load at a rate of over 750 rounds of high quality ammunition per hour.

The Lock-N-Load™ Automatic Case Feeder comes complete with everything you need except the case feeder plates. See the chart below to choose the proper feeder plate for your application.

Lock-N-Load AP
Case Feeder
No. 095300
\$422.59

1) ADAPTS TO YOUR EXISTING AP™ PRESS*

The case feeder will bolt to current LNL-AP's with serial number 7000 and higher. We offer a sub plate conversion for any LNL-AP with a serial number below 7000. If your serial number is below 7000 and you'd like to install a case feeder, give us a call. 1-800-338-3220 and choose the customer service option.

2) CHANGEOVERS ARE QUICK AND SIMPLE

Changing the LNL Automatic Case Feeder from one cartridge to another is a quick, simple and painless process that requires changing the case feeder plate, the V-Block on the cartridge case shuttle and a few minor length adjustments on the feed tube. Change overs typically take about 5 minutes. All the parts you need, with the exception of the case feeder plates, come with the Lock-N-Load™ Automatic Case Feeder.

3) FEEDS EVERY CARTRIDGE

If Hornady makes a standard shell plate for it, the cartridge will also feed through the hopper. (See shell plates listing on page 74.)

4) FAIL-SAFE CASE SLIDE MECHANISM

Slotted cam wire fixture prevents damage from mis-fed cases or incorrectly adjusted shuttle.

5) CASE FEEDER PLATES

There are four feeder plates sold separately, so you only pay for what you need. (Plates shown below.)

6) V-BLOCKS INCLUDED

LNL Automatic Case Feeder comes complete with six V-Blocks to ensure proper feeding of your cases into the shell plate. The instructions include a V-Block usage chart so there's no guessing about which block is correct.

* The Projector press will not accept the LNL™ Automatic Case Feeder.

Lock-N-Load Classic
No. 085001

R E L O A D I N G

The Lock-N-Load™ Classic is the press that pioneered quick die changes overs.

The Lock-N-Load Classic is still king. Its professional grade cast aluminum frame and linkage are over built for a lifetime of service. What really sets the Lock-N-Load Classic apart is the Lock-N-Load Bushing system, 1/12th turn quick release bushings allow for the quickest change over in the industry, and provide the easiest setup, period. Adjust the die, tighten the lock ring and it's done.

F E A T U R E S

1) LOCK-N-LOAD CLASSIC™ PRESS

Includes Primer Catcher and three Lock-N-Load™ Die Bushings. Dies and Shell Holders sold separately.

2) AUTOMATIC PRIMER FEED (OPTIONAL)

Includes both large and small primer tubes. Use with our Positive Priming System and there's no more fumbling with primers—priming is 100% hands off. Sold separately. No. 070905 \$37.77

3) EASY GRIP HANDLE

Large, ball-style grip reduces fatigue. The long handle increases leverage and reduces effort.

4) LOCK-N-LOAD QUICK-CHANGE BUSHING SYSTEM

Lock-N-Load bushings not only let you switch from one die to another in a matter of seconds, they also offer the quickest and easiest die set up on the market. Just set the die and tighten the Sure Loc ring on to the Lock-N-Load bushing and the die is set up... and can be quickly removed and re-installed without the need to readjust the die or keep a separate seater die for each of your pet loads. The Lock-N-Load bushing system is as good as it gets. No one else has 1/12th turn engage/release and the large lugs on the L-N-L system will never clog with debris like threads or interrupted threads can.

5) COMPUTER-AIDED/DRIVEN MANUFACTURING

Today's CNC equipment is capable of

holding incredibly tight tolerances. This means the ram and dies are perfectly aligned which is critical to building perfectly concentric reloads.

6) POWER-PAC LINKAGE AND SOLID STEEL ARMS

Arms rotate on steel pins that run completely through the cast frame. The Power-Pac linkage design multiplies the leverage you apply to the handle, making it easier to size cases and reducing user fatigue.

7) SUPER STRONG ANGLED FRAME

This high strength alloy frame offers the rigidity and stability needed for precision reloading, and is guaranteed never to break or fail. The frame's unique angle gives the reloader greater visibility and easier access to the cartridge in the press.

8) POSITIVE PRIMING SYSTEM (PPS)

The PPS ejects the spent primer at the top of the stroke, picks up a new primer and self aligns to feed and insert the primer at the bottom of the stroke where leverage is best. Our self-aligning primer arm also allows for easy manual inserting of primers without having to raise the handle. All the work is done at the bottom of the stroke. Works easier than ram prime units and much better than old-style primer arms.

Lock-N-Load Classic™ Kit

Just getting started in hand loading? There's no need to search for equipment or worry about what you're missing when you choose the Hornady Lock-N-Load Classic™ Reloading Kit. It comes with everything you need to turn out high-quality, accurate handloads, right from the start.

**Kit includes
3 L-N-L Die
Bushings!**

Handheld Priming Tool

The perfect companion to any single stage press ... Our new handheld priming tool features a new one-piece primer tray with an improved retaining system for the lid. It also features integral molded primer bushings for ultra reliable function and eliminates the need for separate bushings. The system comes with an additional tray designed for use with RCBS shell holders. The body is designed for easy change-over. The seater punch and spring are captured inside the priming tool; allowing shell holders and primer trays to be changed without removing the spring and punch.

LOCK-N-LOAD™ 50 CAL. BMG

\$322⁶⁰

No. 085004

RELOADING

Lock-N-Load™ 50 Cal. BMG

Hornady's Lock-N-Load™ 50 Cal. BMG press allows you to reload your own .50 BMG rounds with accuracy and precision. This single-stage press features our exclusive Lock-N-Load™ technology in the ram. With it you can turn your shell holder over to ram-prime, then move the shell holder to the top plate. Once the holder and ram-prime are set, they stay that way.

A quick change to a Lock-N-Load™ bushing makes switching over from ram-prime to die use faster, too. Together, these features will significantly speed up and improve your .50 caliber BMG reloading.

Order the press by itself, or as part of our .50 BMG Press Kit, which includes our .50 caliber BMG dies.

FEATURES

1) SOLID CONSTRUCTION

You'll get years of reliable reloading from your Hornady .50 BMG Press.

2) .50 CALIBER BMG PRESS KIT

Includes the Hornady .50 BMG reloading press with Lock-N-Load™ technology, a complete set of Hornady .50 BMG reloading dies, and a 50 BMG shell holder.

No. 085005 \$592.88

3) FEATURES LOCK-N-LOAD™ TECHNOLOGY IN RAM

You can turn your shell holder into ram prime then move the shell holder to the top plate. Once the holder and ram prime are set, they stay that way.

4) CONVERTS TO HOLD STANDARD DIES

.50 BMG Press comes standard with a 1-1/2" x 12" bushing to convert the die head to our L-N-L system which will hold any standard 7/8" x 14" die.

HORNADY'S LOCK-N-LOAD SYSTEM MAKES THIS AN EXTREMELY VERSATILE RELOADING PRESS!

The 50 BMG press is the only press that will load any cartridge from 25 Auto to 50 BMG. The press comes standard with 1-1/2" x 12" threads in the die head.

The L-N-L Conversion Kit will convert the die head to our Lock-N-Load™ bushing system for use with any standard 7/8" x 14" dies.

No. 044099 \$18.21

Install the Shell Head Adapter accessory in the ram and load any center fire cartridge you want. Especially useful for shooters reloading long cartridges which require a very long stroke.

No. 392172 \$34.75

Easy to use
Handheld Priming Tool,
see pg. 62

50 Cal. Die Set

Created from select steel and heat-treated for durability and a lifetime of reloading, the Hornady Custom Grade™ New Dimension™ 50 Cal. Die Set is so well-crafted, it's guaranteed never to break or wear out from normal use. For smooth, precision reloading, you can count on Hornady.

No. 544460 \$332.99

50 BMG Primer Seating Gauge

Consistently seating primers in the 50 BMG is critical to wringing all the accuracy potential from it. This precision instrument uses a dial indicator to measure the depth of each primer pocket and the height of each primer. That allows you to consistently seat the primer with the anvil just touching the bottom of the primer pocket every single time – letting you take full advantage of firing pin energy and get a truly consistent result.

No. 050150 \$112.24

High Capacity Metering Kit

Convert your standard L-N-L powder measure to load up to 265 grains of powder in a single drop with Hornady's High Capacity Metering Kit. The kit's two metering units have capacities of 80 to 180 grains and 165 to 265 grains of powder, and come with the clear drop tube and large hopper tube. The clear drop tube visually ensures a complete powder drop. An extended hopper tube is also included so you can reload more rounds between refills of powder. Fits Hornady Lock-N-Load™ Powder Measure. No. 050126 \$77.87

50 Caliber Deburring Tool

Extra large diameter. Precision ground and made from all tool steel!

No. 050153 \$57.24

50 Caliber BMG Powder Measure

Includes an oversized hopper tube, 265 grain capacity metering unit and a see-through extended drop tube so you can confirm a complete powder drop into the case.

No. 050127 \$126.01

Lock-N-Load™ and L-N-L™ are trademarks of Hornady Manufacturing Co.

Hornady's Lock-N-Load™ Powder Measure lets you change powders and settings with the push of a button.

The Lock-N-Load™ Powder Measure offers the most flexible operation and the widest range of any measure on the market today, from .5-265 grains of powder (special metering inserts required). Metering inserts can be changed with the push of a button. Hornady's Lock-N-Load powder measure accessories (shown below) allow one powder measure to do it all, with quick change overs in mind! **No. 050069 \$83.21**

FEATURES

1) LARGEST CHARGE RANGE IN THE INDUSTRY

Go from .5 grains to 265 grains by simply changing inserts. Use one Lock-N-Load™ Powder Measure for reloading everything from small pistol cartridges to .50 BMG and large magnum rifle cartridges.

2) PUSH BUTTON RELEASE FUNCTION

To change metering inserts, just push the Lock-N-Load™ insert release button and insert another metering insert. Simply verify the new charge and you're reloading again right away. Inserts can be swapped in seconds. Go from reloading 30-06 to 45 Auto in no time. Keep the preset inserts with your die sets.

Just push the button and remove the metering insert – no more messing around adjusting powder charges every time you change over – just Lock-N-Load!

3) PRECISION TOLERANCE

With only .002" clearance between the drum and rotor, it's the tightest in the industry for a standard measure. This tight tolerance eliminates powder binding between the frame and drum delivering smooth function with all types of propellant—extruded or ball.

4) MULTIPLE MOUNTING METHODS

Mount to your bench using a standard mounting bracket and lock ring or use our Lock-N-Load™ bushings to mount this versatile measure on the Fast Load Powder Measure Stand (below) or on the Lock-N-Load AP™ w/ case activated powder drop for automatic powder measuring during reloading. (Lock-N-Load™ bushings sold separately on page 79).

5) ADJUSTABLE TENSION

The O-ring on the metering insert adjustment lets you put a slight amount of tension on the metering unit to make fine, incremental adjustments. Once you've set your charge, tighten the lock ring to secure the setting.

6) SMALL AND LARGER DROP TUBES

These tubes speed up powder flow. Two drop tubes are provided standard for 22 to 45 caliber loads. Use the largest drop tube that fits the case mouth. An optional extended drop tube is also available. (See page 58).

L-N-L Powder Measure Accessories are compatible with all L-N-L Powder Measures.*

Pistol Rotor and Standard Metering Insert

For use in your L-N-L Powder Measure, this pistol rotor features a smaller chamber for more precise metering of charge weights between .5 and 17 gr. **No. 050128 \$36.61**

Standard Metering Insert for Pistol Rotor
No. 050116 \$11.40

Rifle Micrometer Metering Insert
No. 050124 \$34.07

No. 050125 \$13.35

Blackpowder Lock-N-Load™ Powder Measure

Hornady's all-metal Blackpowder Powder Measure features a non-sparking aluminum hopper and brass metering unit. It's designed specifically to meet the safety needs of handloaders working with blackpowder. Features include:

1) ALUMINUM HOPPER TUBE AND CAP

The aluminum hopper won't develop a static charge, unlike plastic hopper units. When working with black powder, it's critical to avoid static electricity and any kind of sparking.

2) EXTREMELY TIGHT TOLERANCES BETWEEN DRUM AND ROTOR

The near 2000th of an inch tolerance eliminates binding of powder between the frame and drum for smooth operation with coarse black powder.

3) BRASS METERING UNIT

The metering unit adjusts from 10 to 50 grain in five grain increments, and from 50 to 130 grains in ten grain increments when used with FFG Black Powder. Other sizes of blackpowder, Pyrodex™ and Triple 7™ will drop different amounts. It is MANDATORY to confirm charge weight.

No. 050110
\$145.77

Bench Rest Grade Lock-N-Load™ Powder Measure

Hornady's Bench Rest Powder Measure gives you all the advantages of Lock-N-Load™ technology with the added benefit of more precise measuring. That precision comes from a specially designed metering insert and a smaller metering chamber to promote more consistent and uniform filling.

The micrometer adjustment gives positive reference for metering adjustments and you can install pre-set metering units by simply pushing the button on the outside of the metering chamber. All moving parts have been plated for protection and long life, and the rotor requires NO lubrication.

No. 050130 \$152.04

RELOADING

Fast Load Powder Measure Stand

The incredibly strong Fast-Load Powder Measure Stand has a rigid frame and extra long arm that lets you fill an entire 50-count Universal Loading Block. The Lock-N-Load™ bushing system allows it to accept any measure with 7/8"-14 thread.

No. 050008 \$38.11

1) LOCK-N-LOAD™ BUSHINGS:

If you have more than one powder measure, you can switch them in and out of the Fast-Load stand in just seconds, using Lock-N-Load™ bushings.

2) LONG REACH:

Lets you bench-mount the powder measure and still drop powder in the loading block.

Universal Loading Block

This double side block helps you load quantities of nearly any caliber you choose. Fits Magnum, 308 and 223 size case heads. Also works with Fast-Load Powder Measure Stand to reach every case in the block.

No. 480040 \$4.92

Extended Drop Tube

Lets you put more powder in the case. We discovered it's not only the long tube but also the orifice that makes the difference, it's designed to fill the case slower. Use of the smallest orifice the powder will flow through for best results. **No. 390699** \$43.71
Black Powder PM Extended Drop Tube

Lock-N-Load™ and L-N-L™ are trademarks of Hornady Manufacturing Co.

Case Activated Powder Drop

The new and improved Case Activated Powder Drop has been re-engineered with quick change-overs in mind. The retainer spring has been re-engineered to an in-line design for the smoothest function ever. The case activated powder drop only dispenses a powder charge when a case is present. Designed for the Lock-N-Load AP™ but will work in progressive presses that use 7/8" x 14 threads. **No. 050073 \$62.97**

.17 cal. Powder Sleeve No. 392703 \$6.51

Quick Change Powder Die

Designed specifically for use with the new and improved Case Activated Powder Drop (#050073), this accessory makes changing over your LNL-AP faster and easier than ever! Preset a Quick Change Powder Die for each cartridge you load on your LNL-AP for the quickest caliber conversion on the planet. Includes lower bracket with guide bushing and lock ring. Our new Powder Through Expanders (above) are designed for use with the Quick Change Powder Die.

No. 050074 \$18.97

Powder Through Expanders

The new Powder Through Expanders (PTX) are designed to work in conjunction with the Case Activated Powder Drop. The new Expanders eliminate the need for a separate case mouth expander die on the LNL- AP progressive press, freeing up an extra station on your progressive press for a taper crimp die or powder cop. **\$10.27 per expander**

Caliber	Bullet Dia.	Item No.

Lock-N-Load™ Die and Conversion Bushings

Simply thread a Hornady Lock-N-Load™ Conversion Kit into your RCBS® Rock Chucker or other reloading press using a 1½"-12 thread, and you're ready to start using the Lock-N-Load™ System. It's the easiest way to get the most out of your reloading press. These bushings let you take advantage of Hornady's Lock-N-Load™ technology even if you own a competitive reloading press. The Lock-N-Load™ Conversion kit includes three Lock-N-Load™ bushings and one conversion bushing.

- Lock-N-Load Press Conversion Bushings **No. 044095 \$12.51**
- (2-pk.) Lock-N-Load Die Bushings **No. 044094 \$10.21**
- (3-pk.) Lock-N-Load Die Bushings **No. 044093 \$14.81**
- (10-pk.) Lock-N-Load Die Bushings **No. 044096 \$45.48**
- Lock-N-Load Conversion Kit **No. 044099 \$18.21**

Hornady Powder Cop

Install on your progressive press after the powder drop station to automatically check dropped charges. Checking powder charges on your progressive press can be difficult, and is sometimes ignored, even though it's a smart practice. Hornady uses a similar device on our own ammo manufacturing presses. It won't replace careful attention, but helps monitor the reloading process. Works with all powder types and cartridges. **No. 050063 \$38.19**
