6.5MM • 270 CAL  
30 CAL • 338 CAL

## GMX®

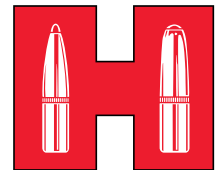

### ***A bullet as SOLID as the reputation of its maker!***

Recovering a GMX® bullet after a broadside shot is often times rare, but after years of field testing on some of the toughest animals on the planet (Warthogs, Gemsbok, Feral Hogs, Zebra, Kudu, Eland, etc.), we finally managed to retrieve a handful.

Hornady® GMX® bullets offer the best choice for a high-performance monolithic solid that delivers devastating terminal performance over a wide range of velocities. Designed to expand as much as 1.5 times their original diameter, GMX® bullets retain 95+% of their original weight.

- Monolithic solid bullet that provides 95+% weight retention.
- Extremely accurate high ballistic co-efficient hunting bullet.
- Controlled expansion across a wide velocity range.
