

**New Bullets &
Loads for 2011!**

GMX[®]

***A bullet as SOLID
as the reputation of its maker.***

The new Hornady GMX[®] (Gilding Metal eXpanding) bullets offer the best choice for a high-performance monolithic solid that delivers devastating terminal performance over a wide range of velocities. GMX bullets are designed to expand up to 1.5 times their original diameter and retain over 95% of their original weight.

Unlike their all-copper counterparts, the GMX[®] is harder and tougher than copper and shoots cleaner, too. Its substantial boattail and double cannelures create less bearing surface and allows handloaders to use the same reloading data as an SST bullet of the same weight.

Bullets

6MM • 25 Cal
6.5MM • 270 Cal • 7MM
30 Cal • 338 Cal

Ammo

243 Win • 25-06 Rem
6.5 Creedmoor • 270 Win
7MM-08 • 7 x 57 Maus
280 Rem • 7MM Rem Mag
308 Win • 30-06 Sprg
300 RCM • 300 Win Mag
338 RCM • 338 Win Mag

THE CHOICE IS YOURS!
