

The Strion Series now has expanded charging options!
 The new PiggyBack charger features dual power input — via USB
 or “traditional” AC/DC power sources. It doubles your run time
 by charging your Strion and a spare battery.

PiggyBack® charger doubles your run time
 by charging a spare battery so you can keep
 on working; reduces down time
Battery sold separately

Integrated micro-USB interface
 specifically designed to guide the plug
 into place for a secure connection

Strion® LED

Strion® HPL™

Strion LED HL®

Convenient charging via modern devices or “traditional” AC/DC power sources

PiggyBack charger allows you to simultaneously charge your Strion Series flashlight
 and a spare battery so you will always have a light when you need it

Mount the charger and plug it right into your new tool box’s USB port – mount, plug
 and charge right from your tool box

Chargers have a two year warranty
 Visit www.streamlight.com for full warranty information
